Lateral Cassette Holder Plus

Multi-articulating
Swivel Arm with
Variable Height Control

Multi-Articulating Swivel Arm and Variable Height
for Portable DR Panels; as well as all CR and Film Cassettes

QT-LCH-P LATERAL CASSETTE HOLDER PLUS

Quantum Medical Imaging's **Lateral Cassette Holder Plus** (QT-LCH-P) is the perfect addition to Quantum's product portfolio. This lateral cassette holder works with CR, portable DR or Film Cassettes up to 14" x 17"; with a convenient size adjustment control. The Lateral Cassette Holder Plus can be easily maneuvered to allow a new cassette to be inserted or removed.

With the multi-articulating swivel arm ($\pm 90^\circ$ degrees) with height control, a variety of exams are capable of being performed with minimal patient movement. The multi-articulating swivel arm provides for a variety of angled positions enabling the technologist to obtain exams of difficult to image areas.

This new design enables the receptor/cassette to be positioned on or below the table-top to eliminate image cut-off. When using on a Quantum table, the holder can be positioned on either side of the table's accessory rails.

- Assists in acquiring cross-table lateral exams, as well as many other special views
- Provides positioning of receptor/cassette either on or below table-top to eliminate image cut-off; Height Adjustable
- Multi-articulating swivel arm ($\pm 90^\circ$) allows variety of angled positions
- Mounts along either side of Table Accessory Rails
- Accommodates CR, portable DR or Film Cassettes up to 14" x 17"; with convenient size adjustment control
- Angulation ability; complete receptor can be angled by $\pm 35\%$ for best patient positioning

The Lateral Cassette Holder Plus is shown above and below with the DRX-1 Portable Panel.

QT-LCH

Lateral Cassette Holder

for Portable DR Panels; as well as all CR and Film Cassettes

QT-LCH LATERAL CASSETTE HOLDER

Quantum Medical Imaging's Lateral Cassette Holder is specifically designed to be used with Remote Digital panels, as well as all CR and film cassettes up to size of 14" x 17".

The Lateral Cassette Holder quickly and easily slides onto the side rails of any Quantum Series tables. The Lateral Cassette Holder's articulating swivel arm allows the technologist to position it close to the patient for cross-table, as well as decubitus exams. The $\pm 90^\circ$ rotation of the articulating swivel arm allows for angle views of various anatomical regions.

With the Quantum Lateral Cassette Holder the technologist no longer needs to stand in the exam room to hold the plate in position.

Quantum's Lateral Cassette Holder is another innovative product solution, which aids in the imaging of patients.

- Mounts to Quantum Table Rails
- Accommodates portable DR panels, CR or Film Cassettes up to 14" x 17"
- Accommodates CR or Film Cassettes up to 14" x 17"
- Articulating swivel arm ($\pm 90^\circ$) allows variety of angled positions, along table-top

The Lateral Cassette Holder is shown above and below with the DRX-1 Portable Panel.
