LOW PRESSURE LINES:
Sterile, Clear, Flexible, Straight and Coiled Low Pressure Extension Lines; available in multiple lengths; designed for use with multiple connections, including needleless valves, to help prevent sticking, breaking and overtightening; and to withstand pressures obtained during CT procedures.
LOW PRESSURE LINES

PREVENTS CONTRAST LEAKAGE

ELIMINATES OVER TIGHTENING AND Luer BREAKAGE

COMPATIBLE WITH NEEDLELESS VALVES

PROVIDES HIGHER FLOW RATES & LESS PRESSURE DURING INJECTION

300 PSI RATED CHECK VALVES

1. lower cost
2. enhanced productivity
3. supports optimum clinical outcomes
