

**In the
selection
of syringes,
some
choices
are
clear**

MEDRAD®

...Medrad makes them clearer and therefore safer.

Ever since *Medrad* introduced the first disposable angiographic syringes, we've taken special pride in making them better. As needs have changed over the years, we've made *Medrad Syringes* easier to use, more convenient, and clearer, all of which makes them **safer. The key to *Medrad's* superior performance and reliability: *our* syringes are designed and calibrated as part of a **Total Fluid Delivery System**, meeting the highest standards of *Medrad* injectors. Because *Medrad* believes some choices should be clearer than others.**

CE 0123

With angiographic syringes, greater clarity often means greater safety. *Medrad's* Syringes are designed to make it easier for you to detect air bubbles. You can see the contrast inside the syringe, and a clear nut at the tip provides the best air bubble visualization available.

Quality is also clearly evident in every *Medrad* Syringe. Ribbed, reinforced necks provide extra strength. Operating plungers are designed to perform without sticking, alleviating uneven delivery. And the quick fill tubing shortens your preparation time, while giving you the most efficient setup possible.

Convenience is important in contrast delivery...it directly contributes to the quality of services you provide. That's why *Medrad* gives you a variety of syringe sizes to meet your patients' individual needs. We also design and calibrate *our* syringes so they are easier to connect to *Medrad* injectors and deliver contrast smoothly according to your exact requirements.

- It's more than another syringe—it's designed and calibrated to work with the *Medrad* injector as an integral part of our ***Total Fluid Delivery System.***
- *Medrad's* history of consistent quality ensures that our syringes provide superior performance with each procedure.
- Because procedures and dosages differ, *Medrad* Syringes offer you flexibility with multiple sizes.
- *Medrad's* complete range of syringes fit all major injectors, so you can choose the proper syringe to meet the exact needs of *the procedure* and *the patient.*

At *Medrad*, we believe there can be no compromise in quality when designing a contrast delivery system. It's why *Medrad* is committed to ***Quality for Life.***[®]

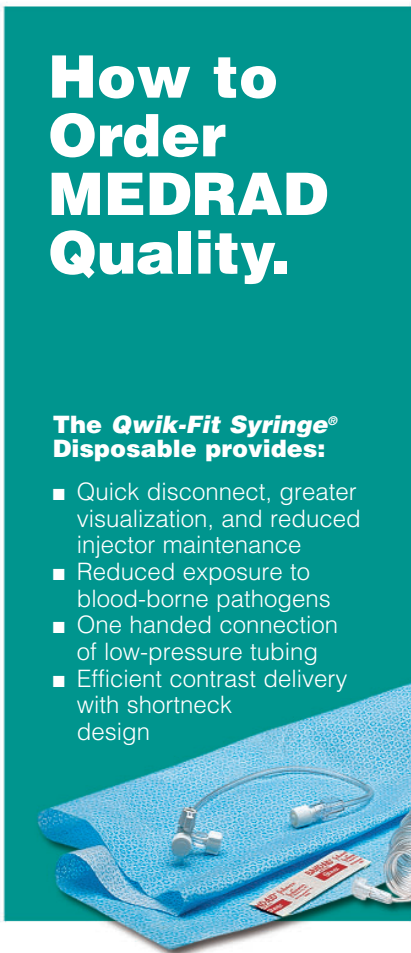

To find out more about *Medrad* Syringes and the benefit of utilizing our ***Total Fluid Delivery Systems***, contact your local *Medrad* Representative at 1-412-767-2400.

How to Order MEDRAD Quality.

The Qwik-Fit Syringe® Disposable provides:

- Quick disconnect, greater visualization, and reduced injector maintenance
- Reduced exposure to blood-borne pathogens
- One handed connection of low-pressure tubing
- Efficient contrast delivery with shortneck design
